

# LUBEALLOY

## SPECIALISED LUBRICANTS

### LA 258 Chain & Cable Lubricant

#### Description

LA 258 is a 'premium' lubricant especially designed for ultra long-term preservation of today's chains, cables and wire ropes. LA 258 chain and cable lubricant is semi-fluid, containing a precise percentage of high-contrast fluorinated polymers in the form of methacrylates manufactured only for chains, cables and wire ropes in the maintenance industry.

#### Contaminant Resistant

- Higher pressure point reducing wear between the metal surface
- Reduced scar and wear upon chains and/or cables

#### High Temperature

- Chemically structured so as not to form a residue when volatilized or thermally decomposed at high temperatures
- Recommended as a lubricant for oven and kiln bearings, especially the conveyor chains
- Ideal in and around thermal high temperature applications operating between -27°C and 200°C

#### Oxidation Responsive

- Ensures that oxidation is nullified
- Chains, cables and wire rope retain flexibility

#### Versatility

- May be used in some gear boxes requiring EP gear grease for high load application

- Highly versatile lubricant
- Effectively be used on chains, cables and other areas

#### Highest Affinity

- High-purity lubricant that provides a new dimension to penetration quality requirements
- Mechanical ability to migrate to the core of the chain, cable or wire rope to lubricate the internal strands where the greatest stress occurs

**Highest Affinity**

- High-purity lubricant that provides a new dimension to penetration quality requirements
- Mechanical ability to migrate to the core of the chain, cable or wire rope to lubricate the internal strands where the greatest stress occurs

**Application**

LA 258 provides exceptional long-term protection for the following: -

Anchor Chains	Disc Couplings	Multiple Strand Ropes
Ball Mills	Elevators	Roller Chains
Block & Jaw Coupling	Enclosed Malleable Iron chains	
Sling Chains	Closed End Chains	Hoist Chains
Conveyor Chains	Marine Equipment	Transmission Chains
Crane Cables	Mine Head equipment	6 x 7 Strand Ropes
Detachable Link Chains	Mobile Lifts	6 x 19 Warrington Ropes

Easy to apply as no heating is required. Can be applied by brush, drip feed or through a bath.

**ISO/VG 220**
