

LUBEALLOY

SPECIALISED LUBRICANTS

LA 152 Farm & Machinery PARA-SYN Grease

Description

LA 152 possesses superior lubrication characteristics due to the selected PARA-SYN base oil combined with adhesive supplements and effective Extreme Pressure additives to cater for unusually high load service conditions. LA 152 protects against wear on all moving parts from SHOCK LOADING to HIGH LOAD service areas of machinery.

Shear Stable and Adhesive

- Formulated to include a shear stable tackiness agent which has the adhesive and cohesive characteristics to stay put
- Effectively cushions the impact between metal surfaces

Rust and Corrosion Enhanced

- Exclusive rust and corrosion inhibitors protect all metal components under environments which may be corrosive or rust prone due to moisture

Oxidation Resistance

- Won't harden in storage or use

Application

- Recommended for high and low speed journal, ball and tapered roller bearings

operating under all service conditions

- Excellent service record under unusually high load and/or shock load service conditions
- Prime recommendation for trucking, farming and equipment, construction and manufacturing industries when a cohesive and tenacious grease is required
